

Carefree Speed Stripper

Rapid floor preparation

Professional floor care made simple

- Powerful solvent based stripper
- Low foaming
- No rinse formula

Powerful solvent based stripper

Carefree Speed Stripper offers fast and effective floor preparation. The powerful solvent based stripper removes all types of emulsion floor polish and cuts through the heaviest of build ups. It can be used on all common floor types such as vinyl, thermoplastic, rubber, colour fast linoleum, marble and terrazo. It should not be used on wood or painted floors (use Carefree Stripper).

Low foaming

The advanced low foaming formulation means Carefree Speed Stripper can be used with scrubber drier machines to prepare large expansive areas quickly.

The excellent wetting and emulsification properties also make it an effective mop stripper for those harder to reach areas where machine use is unsuitable.

No rinse formula

Carefree Speed Stripper's revolutionary formulation enables floors to be stripped and re-coated without the need to scrub or rinse. Tests illustrate that Carefree Speed Stripper can reduce floor preparation time by as much as half, offering huge cost-savings in staff labour whilst simultaneously minimising customer inconvenience.

Carefree Speed Stripper

Use instructions

5 litres covers 250 m² (1:5 dilution).

Step One: Prepare the floor

Position warning signs and leave in place until surface is dry. Protect hands with suitable gloves.

Dilute 200 ml of Carefree Speed Stripper per litre of **COLD** water (1:5 dilution) – dilute at higher concentrations for heavier build ups of polish. Spread solution over the floor leaving uniformly wet.

Wait 5 minutes to allow solution sufficient contact time and then agitate floor with a suitable utensil. Leave for a further 5 minutes but do not allow the floor to dry out. Remove slurry with a mop or TASKI wet pick up machine.

Step Two: Protect the floor

Protect the floor using Carefree Eternum high gloss floor polish.

Step Three: Maintain the floor

Maintain the floor with Carefree Maintainer.

Technical data

Appearance	Clear, colourless liquid	Dilution rates	Standard stripping: 1:5 dilution
pH	13.0-14.0		

The above data is typical of normal production and should not be taken as a specification.

Product	Pack size	Cases per layer	Cases per pallet	Article code
